

Phase 1: Design

Milestone 1: Requirement Gathering & Planning

- **Description:** Finalizing the project scope, requirements, and detailed project plan. This includes confirming design preferences, API choices, and payment gateways.
- **Time:** 3 days
- **Price:** \$500

Milestone 2: UI/UX Design & Wireframes

- **Description:** Developing wireframes for all key screens, including the homepage, booking pages, user dashboards, and payment pages. This step also includes selecting the color palette, typography, and logo design.
- **Time:** 1 week
- **Price:** \$1,500

Milestone 3: High-Fidelity Prototyping

- **Description:** Creating high-fidelity prototypes using Figma that reflect the final design, including interactive elements for user experience testing.
 - **Time:** 1 week
 - **Price:** \$1,500
-

Phase 2: Development

Milestone 4: Frontend Development

- **Description:** Implementing the frontend using React.js, creating a fully responsive design that matches the approved prototype. This includes all pages like the homepage, booking forms, user profiles, etc.
- **Time:** 1 week
- **Price:** \$2,000

Milestone 5: Backend Development & API Integration

- **Description:** Setting up the backend using Django, including user authentication, API development for the frontend, and integration with third-party APIs for accommodations and flights. This also includes integrating payment gateways for both cryptocurrency and traditional payments.
- **Time:** 1.5 weeks
- **Price:** \$2,000

Milestone 6: Testing & Deployment

- **Description:** Conducting comprehensive testing of the entire system, including frontend, backend, payment processing, and API integration. Ensuring all components function correctly across devices. Deploying the website on a cloud hosting platform.

- **Time:** 3 days
 - **Price:** \$500
-

Total Estimated Time and Cost:

- **Total Time:** 1 month
- **Total Price:** \$8,000
